Specifications

Width: 737 mm

Depth: 832 mm

Weight: 15 kg

Height: 874 mm

Seat Height: 365 mm

Information

Designer: Chris Martin

Year: 2020

Description

Jump is a neat armchair with a seat floating freely in a slim steel frame. The steel frame elegantly connects the chair's four elements – armrests, backrest, and seat. The simple construction and assembly enable a removable upholstery, which can be washed or replaced, for an extra dimension of increased service life. The visible steel frame is softened by the rounded armrests in wood, and the upholstered seat and backrest.

Jumps seat and backrest can be upholstered in any textile and the steel frame is available in the colors Black, Blue Green and Azores Blue, the latter two options are combined with armrests in oiled oak. The steel frame in black can also be combined with armrests in oiled walnut.

Instructions

For cleaning advantageously use a detergent, or mild pH neutral detergent and lukewarm water in a well wrung cloth. Then wipe off with clean water and wipe dry. To preserve the look and finish you should be aware not to use: – Alkaline or aggressive cleaners, – Solvent – Preparations containing abrasives, – Abrasive tools. Remember not to let the cleaners or other liquids on the surface for long. For furniture and surfaces for use in public spaces, it is also important to remember not to use disinfectants that contain a high concentration of alcohol or alkaline substances, such as 70% alcohol. There are disinfectants that can be advantageously used, but that does not affect the painted / varnished surface appreciably. Note that freshly painted surfaces are susceptible to scratching. Surface final resistance is only achieved after about a month. Tape and other foreign substances such as, for example, adhesive and moisturizers can soften the treated surface and cause peeling / paint drop.
