Depth: 1800 mm

Height: 790 mm

Seat Height: 380 mm

Information

Designer: Chris Martin

Year: 2021

Product image may differ from your selection.

Description

BAM! is a sofa reduced to its basic geometry with two block-shaped volumes creating a seat and back. The design has clear influences from Pop Art culture, and as the name suggests, the sofa leaves the spectator with a sudden and distinct first impression.

The legs come upholstered in the same textile as the seat and back. Both its design and supporting function draw their inspiration from Gothic buttresses.

The included cushions are filled with recycled goose and duck feathers from old down products. One of the cushions has been designed with details of a black large embroidered patch with the text BAM!, a nod to the American artist Roy Lichtenstein.

BAM! is delivered disassembled in flat packages, for a climate-smart transport. The flat packages are also easy to transport and assemble, where a few components are connected with a smart wedge fitting.

Instructions for Fabric

Leather is a living material that matures beautifully if treated properly. You should therefore consider the following:

Never place leather furniture closer than 20-30 cm to a radiator or in direct sunlight.

Vacuum clean leather often with a soft brush and, when necessary, clean any exposed surfaces, such as armrests and headrests. For stains that are water-soluble, dampen the area and dry using a paper towel. If you should get a stain that cannot be removed, never experiment with strong solvents or chemicals. The problem could get worse, needing to be repaired: instead return to the store from which you purchased the furniture and ask for advice. If the staff cannot answer, ask them to contact the manufacturer for the correct advice.

For you to be able to take the best possible care of your leather furniture, Elmo has developed a water-based leather care programme with a cleaning (leather cleaner) and a protective (leather protection) component.
